✓ UK Right to Work · Graduate Route Visa · No sponsorship needed · Valid until March 2028

PROFESSIONAL SUMMARY

.NET / C# backend engineer with 4+ years delivering production grade APIs, microservices, and full stack web applications for enterprise clients now actively expanding into Machine Learning and AI engineering. Proven impact in real environments: cut deployment effort by 30% through CI/CD automation and reduced query latency by 25% via EF Core and SQL optimisation. Built an end to end NLP pipeline for multilingual audio transcription and AI summarisation as an MSc final year project (PyTorch, OpenAI Whisper, HuggingFace Transformers). Currently based in London, working at a UK tech firm. MSc Computer Science (Distinction), University of Hertfordshire, 2025. Fully eligible to work in the UK —no sponsorship required.

TECHNICAL SKILLS

Core C#, .NET 6/7/8, PHP, ASP.NET Core MVC, REST APIs, Microservices, SignalR

Frontend HTML5, CSS3, Bootstrap, JavaScript (ES6+), TypeScript, React.js, Next.js, jQuery, Blazor, Tailwind CSS, Laravel

Databases SQL Server, PostgreSQL, MySQL, MongoDB, Redis, Entity Framework Core

Cloud/DevOps Microsoft Azure, Azure DevOps, Docker, Kubernetes, CI/CD Pipelines, PowerShell

Architecture MVC, CQRS, Event-Driven, RabbitMQ, SOLID, Design Patterns

Testing xUnit, Moq, Jest, TDD, Postman, Git, Agile/Scrum

AI / ML Python, PyTorch, HuggingFace Transformers, OpenAI Whisper, BART, MarianMT, NLP, Google Colab

AI Tools ChatGPT, Copilot, Claude, Claude Code CLI, Gemini

PROFESSIONAL EXPERIENCE

Senior Backend Developer (Contract) · HolistiQ Technologies Ltd · London, UK

Oct 2025 – Present (part time contract alongside MSc completion)

- Architect and develop high-performance .NET 8 microservices in a distributed system, improving scalability across 5+ independent service domains.
- Design and optimise RESTful APIs for complex business workflows, achieving measurable improvements in throughput and response times.
- Lead architectural and performance tuning initiatives within Agile sprint cycles, collaborating directly with senior engineers and product owners.

Software Engineer · Goodhope Asia Holdings Ltd · Sri Lanka

Oct 2023 – Sep 2024

- Built and maintained enterprise ASP.NET Core applications serving 500+ internal users across multiple business departments.
- Automated CI/CD pipelines with Azure DevOps and PowerShell — reduced manual deployment effort by 30% and lowered release risk.
- Resolved critical SQL Server / EF Core integration failures, eliminating a recurring class of production runtime errors and stabilising key APIs.
- Delivered backend features consistently on time across multiple Agile sprint teams, meeting code review and quality standards.

Associate Software Engineer · Knightsbridge Technologies · Sri Lanka

Dec 2022 – Oct 2023

- Developed ASP.NET Core backend services and React.js frontend components for client-facing applications.
- Optimised EF Core queries and SQL stored procedures — reduced average query latency by 25%, improving overall responsiveness.
- Diagnosed and resolved recurring API failures, significantly improving production uptime and system reliability.

Associate Software Engineer / Intern · Codevita Pvt Ltd · Sri Lanka

Nov 2021 – Dec 2022

- Developed backend modules using Laravel, ASP.NET, and Python across multiple client projects.
- Designed optimised SQL queries powering real-time analytics dashboards, enabling faster business reporting.
- Contributed to feature development, debugging, and integration testing in Agile environments.

Full Stack Developer · Freelance · Remote

2022 – Present

- Designed and delivered scalable web applications using C#, Blazor, SQL Server, React, and Next.js across multiple industries.
- Implemented Docker-based containerised deployments for consistent, reproducible dev-to-production environments.
- Managed full project lifecycles — from client requirements through to production-ready delivery — independently.

AI / ML PROJECT — MSC FINAL YEAR

NHS Audio Intelligence System · github.com/Nadarajahsivakaran/NHS · Python · PyTorch · HuggingFace · Flask · React

- Built an end-to-end multilingual audio intelligence pipeline: speech-to-text transcription, language detection, translation, and AI summarisation — designed for NHS / healthcare settings.
- Integrated OpenAI Whisper (large model, GPU-accelerated via PyTorch/CUDA) for high-accuracy speech recognition with noise reduction preprocessing using librosa and noisereduce.
- Implemented multilingual translation using HuggingFace MarianMT (Helsinki-NLP) supporting 12+ languages, with Google Translate API as fallback for unsupported language pairs.
- Applied Facebook BART (bart-large-cnn) via HuggingFace Transformers to generate concise AI summaries from transcribed and translated clinical audio.
- Exposed the full ML pipeline as a REST API via Flask; integrated with a React.js frontend — demonstrating end-to-end AI product delivery from model to UI.

EDUCATION

MSc Computer Science — Distinction · University of Hertfordshire, UK · 2024 – 2025

BSc Computer Science (Hons) · Uva Wellassa University, Sri Lanka · 2018 – 2022

CERTIFICATIONS

Microsoft Azure AI Fundamentals (AI-900)
